THE Democratic postmaster of Rich-nord, Va., has been lately in Washington and reported at headquarters that the Demcorntic party of that city was in better con Cities than ever. If he had reported that the mail service between this city and lifel mond was in a worse condition than it has been since the war closed he would have been 120 miles nearer the truth.

The halter is tightening around the Democratic tally-sheet forgers in Ohio and Indiana. One of the indicted thugs in Columbus has further confirmed his party faith by an assault that was intended to be deadly upon one of the prosecuting counet). They are desperate gauge, and it is the shame of Democracy that it is trying in every conceivable way to produce the es-

THE beem of "Horizontal" Morrison as Mr. Cleveland's companion on the presidential ticket is undergoing a hot house remotion, which seems to be more inspirig than healthy. If free trade is to be the Lemocratic war cry the team is well matched. Morrison is an honest crank on the subject of tariff smashing, and as a can-cidate would give the Republicans all the comfort they might fall to derive from other Democratic blunderers.

SENATOR PLUMB, in response to Senato Beck's free trade barangue, exposed the inconsistency of the Democratic senators by recalling their records in favor of pro tecting by legislation the interests of their own states, either by internal or tariff taxes. He instanced the whisky monopoly, the sugar trust, and the protected rice intercate as creatures particularly of their votes and their efforts. The Democrats are receiving a good deal of information concerning themselves that will interest the voters later on.

The senior senator from Kentucky falls as regularly and as naturally into free trade as Silas Wegg did into poetry. Every year he marages to repeat that same old familiar speech against the tariff, and just as reguharly he hijects it into some subject enasy he jumped into the debate on the penson bill, and relieved himself by an hour's tirade of a great deal of ill feeling. Mr. Feels is apparently very angry with the tariff legislation, and it was perhaps appropriate that he should associate that with the cidier, who excites in his breast equally

The free trade rump in the House are saving a tough time procuring the desired support for their raid on the tariff. They oasted that the wool manufacturers were worable to free wool, and went to Rhode land for proof. They were handling a becmerang. Rhode Island responded lmost solidly for protection to the wool industry, only three straggling mill men favoring free wool, and they for the reason that they have greater interests in other trade abroad. Later on they comforted themselves that New York wanted free raw materials. Two hundred and thirty manufacturers in the city were polled, of whem_those employing 32,000 workmen were against tariff reduction, and those employing only 1,300 were favorable to the Cleveland plan. The free trade junto would do well to let practical business fairs severely alone, and swear hard by theory as their best hold.

Quick Returns for Good Work.

The New York Some prints some statistics howing that whenever the Republicans of New dersey display a purpose to legislate for temperance they decrease the independent probabilition vote and increase their publican legislation for high license and option, just enseted, will help the Republicans and Injure the Democrats in the ensuing compaign. Its regrets over this state of affairs are solemnly expressed in the sul leined paragraph:

racy. Very materially, theretaind an aperty ever finding in New Jersey was just 1,112. The natrox margin of Hammoratic safety in that slate is understill narrower by the reput to the Republican ranks of mouseness of tem peraces Republicans who have been sering terrocarly with the Probibilionest organica-tion and that mun is a find who cannot force force open the Democrats of this great manufacturing and protectionist state a free-trade platform and a free-trade candidate. The Probliddon vote of New Jersey in

less was 19,000;

The you might have colorged its moral so as to have taken in New York, where also, the Republicans are shaping legislation after a similar pattern. New York and New Jersey have cast the largest relative prohibition vote, and doubtless, as the San says, it has been because heretofore no practical measures to check the liquor traffic have been devised. An honest effort in the direction of reform at once attracts the temperance men, and those who are not mere crants will naturally return to the

Econblican party. Adding the load of free tradelem to the

odium . . . atoon influence will, indeed, make.

The Dark Lantern Tariff Bill. A critical examination of the bill pr rared by the Democratic members of the ways and means committee shows that it is a long stride toward free trade. The passage of such a measure, of which there is not the slightest prospect, would break

lown numbers of American industries, or

force American employers to offer such

wages as are paid in Europe.

The calculations made, which show a reduction of revenue under this bill, are absolutely false, because they are made pon false basis. The basis of reduction dopted in making these tables was that there would be no more importations under this tariff than under the one now in exstence. A babe in its swaddling clothes ught to know better than to suppose there would not be more imports under a tariff nder a tariff of \$17 per ton. The Demo-

Spence does not exceed that of a suckling infant. So with all the other articles; reductions are made upon woolen goods, upon cotten goods, upon manufactuers of wood, of iron, of steel, and, in fact, upon almost everything. It is well known that many of these articles are imported and sold in competition with American goods even at the present rates, and that at lower rates the importations will be doubled, trebled, quadrupled, and in some instances be ten and twenty fold as great.

know this fact ; if they do not, their intel-

Lest year we imported a million tons of steel ralls with the duty at \$17. Steel rails are transfactured in Saxony and Belgium at \$14 a ton; they are then transported to THE MANASSAS PANORAMA-1519 4L & Oblony New York at \$1 per ton with a dity of \$17, that made them worth \$72 per ton, and American rails could be manufactured and sold at about that price. With the duty at \$11 per ton these for-eign rails can be put, duty pild, in New York at \$26 per ton. At that price the American factories will close, and all the steel rails needed in the United States will be imported, thus increasing the revethe more than all the reductions claimed

for this bill. it is, however, hardly necessary to discuse Mr. Mills's bill except for the purpose of letting the people know what these Democratic gentlemen want to do. There is no possible danger of the bill ever be-coming a law; it will never even pass the House of Representatives in anything like its present form. There are enough representatives in Congress who are not committed to the doctrines of the Cobden Club to prevent the passage of this measure.

A LAWYER'S OFFENSE.

Charged With Forging a Check for Fifty Dollars.

Samuel T. Drury, a lawyer, was charged in the police court yesterday with forging the name of Mrs. Mary Shaw, 110s Fifteenth street porthwest, defendant's sister-in-law, to a northwest, defendant's sisterin-law, to a check for \$50. Drury cashed the check at the National Bank of Washington, Mrs. Shaw said that she had drawn two checks, one for \$50 and the other for \$50 from the bank, but had never drawn a check tor \$50. She learned of the forgery when she called at the bank, and was told that she had no funds there. The defendant said that Mrs. Shaw signed the check, and that he did not, and stated that at the time the signed it she was nervous. The case was sent to the grand jury, bonds \$500.

Lovers of minde in Washington will learn with regret of the death of Prof. Ernest Szemelenyi, the father of the well known concert melater. Deceased was born in Adstria in 1824, and came to this country some farty years ago, settling in New York, and subsequently removing to Baltimore, where he resided until his death, at 820 p. m., Mar. L. Deceased was a master of languages and a relognized authority on all matters portaining to music in its highest branches, being at the time of his death one of the best teachers in the United States. He has often contributed articles of interest to the press, which have been of the greatest importance to musicians, not only on account of the information contained in them, but the deep research and investigation displayed. Deceased leaves a widow, son and daughter, both grown.

THE GEORGIA CONFERENCE Takes Impertant Action on the Blair

Education Bill. The scoretary of the Loard of education of the Atlanta district (white) Methodist confer-cace, Georgia, says, in his last annual report

"All our people should be able to write their own ballots and to read divine and human laws. But," he adds, "full 40 ber cent. of the people of discreta are unable to write their own ballots and are dependent on others to de their thinking, nor is this confined to the control masses. We would express with strong sad, and agonized emphasis the fact that the whites of the conth need our educational at tetricin as much as the blacks. The state provides for only three montas tuition for he constances, not more than two thirds of thine is taught in many places. Our school houses, unworthy the name, are not formished or otherwise adapted for effective work."

After reviewing the stock arguments of the constitutional objections urged against federa aid to common schools, which, he avers, the so greatly need, this secretary of the M.
